

## A touch can be healing...

From admission to discharge, PDI's goal is to help you achieve zero HAIs by providing products and solutions to address everyday touchpoints — medical equipment, computers, door handles, hands, patients themselves — which contribute to the spread of infectious disease among patients, visitors, caregivers and staff. Our commitment to you includes our dedicated team of Medical Science Liaisons and Field Representatives to educate, train and support your staff in infection prevention.

In addition, we offer the industry's most trusted and comprehensive portfolio of infection prevention products. From skin antisepsis to surface care, hand hygiene and patient care, PDI products clean, disinfect or sanitize critical touchpoints throughout your facility.
