

HYGEA® TOUCHPOINTS™

So many lives are touched by you and your staff each day...

But even as hope and healing are administered, the deadly risk of healthcare-associated infections remains. From admission to discharge, PDI's goal is to help you achieve zero HAIs by providing products and solutions which address the everyday touchpoints that contribute to the spread of infection.

A recent study published in the American Journal of Critical Care identified the use – and misuse – of basin baths as a potential risk contributing to the spread of HAIs in healthcare settings.¹

© Hygea® pre-moistened disposable adult washcloths are practical alternatives to basin baths:

- Provide skincare to even the most vulnerable residents
- Contain mild cleansers and soothing Aloe for gentle yet effective cleansing
- Manufactured in the U.S. to the highest quality standards
- Ideal for overall body cleansing and incontinence care
